

# LineATA **LINE Gateway for PBX & Phone**

LineATA introduction YouTube <https://youtu.be/rd5xjo09GWE>

YouTube caption is available.

## **Main Features**

1. After LineATA is connected to office's existing PBX, analog conference phones or regular phones, employees just pick up their desk phone for LINE calls. Leave employee's mobile phone for more calls and add extra LINE call lines for your office
2. Make or receive LINE calls through desk phones or regular phones without changing employee's telephone habits
3. With LineATA, employees out of office, company's customers or suppliers can have a free LINE call to office to save the expensive international or mobile calls
4. Support LINE speed dial number and the speed dial list can be exported for backup and imported for use
5. LINE DOD - Support automatic assigned LINE friend callout when the phone is off hook
6. LINE DID – Incoming LINE calls will be forwarded automatically to the assigned PBX extension number for customer support
7. "Audio recovery" button resolves LINE call party's problems of hearing each other
8. Support FSK type I-like Caller ID for LINE incoming calls and display "LINE 566" or "566" and calling time
9. LineATA under IM mode supports other softphones like Teams, Lync/Skype for business, Google voice/hangouts, WhatsApp, Facebook Messenger, Zoom, Skype, as an audio device (Speaker/Microphone function). When LineATA is connected to office's existing conference phone, the conference phone will become a dedicated LINE or other softphone conference phone
10. Support popular PBXs and cordless phone sets including DECT, 5.8GHz, 2.4GHz, 900 MHz or others
11. Support international busy tone to make PBX application achievable
12. Support 2 REN standard loads and 20, 25, 30 and 50Hz ring signal frequency
13. Support LineATA software online upgrade and latest software version check/download
14. **LineATA can run the recent SkyATA software to work as a Skype gateway**
